

V-ON Solar CCTV

SC4G3MP

Product Overview

Solar CCTV - SC4G3MP is a Single camera setup, that runs on 4G LTE. The product is suitable for Small farms, Houses, Properties, Construction sites etc. The camera has a SIM card slot for the mobile network, and a 128GB SD card slot, where the recorded data will be stored. The system will come with a free mobile app, that enables the user to view the live feed, the recorded video and control the camera from anywhere, anytime with a minimum 4G network availability. The camera setup is powered with Solar and runs relentlessly even on rainy days. The solar camera is designed keeping in mind the mobile application, that allows the user to move the setup to the network enabled zones and use at any point of time.

Camera

The camera of the system is a Make-in-India product and comes with inbuilt 4G module. The camera is of 3MP resolution and has a 72 degree FOV. It comes with a 15W equivalent Lighting, enabling colored views of the property even at night. However, one could switch between full color and infrared mode.

Solar Power Unit

The system comes with a 40W Solar panel, equipped with a 12Ah LiFePO4 Battery and can support the camera with uninterrupted power overnight, even on a cloudy/rainy day.

Mobile App

The Camera has a free mobile App, compatible with Windows, Android and iOS

The product package includes

Solar Panel with Battery Setup, 4G camera, 3 piece Mounting Fixture, Nut-Bolts & 2 Piece Pole
